

Commissioning Engineer

Are you an experienced commissioner who likes to travel, easily changes location (Ede and abroad, outside the Netherlands) to be able to proudly say that, partly because of your knowledge and skills, the customer is 100% satisfied with our robot machine. Join PWR and rise to the challenge with our highly technical solutions for machine building.

This will be your job

Full of enthusiasm you take charge of the machine during the in-house test phase. You are responsible for the implementation and commissioning of our latest packaging machines at our customers. You are our specialist at site and the first point of contact for the customer in this final phase of the project. You ensure a correct handover of the operating instructions and you solve any problems that arise during commissioning.

We are looking for you because you are enthusiastic and experienced in mechanical engineering and traveling; you know what it is like to be away from home and have no problem working irregular shifts.

Success is yours by

Your work starts with a fully assembled machine (supplied by the assembly team) and prepared software (supplied by the software department). You are responsible for bringing these elements together into a working whole:

- performing I / O check and setting up the PC
- calibrating and adjusting the various machine parts
- testing and debugging the machine functions using a test plan
- solving any problems together with the project team in order to finish the machine in time and get a customer approval.
- preparing validation reports

As soon as everything is OK, the machine is taken down and then reinstalled at the customer site. It's your turn to put the machine back into operation mode, identify problems and solve them. Finally, you train the customer's personnel to operate and maintain the machine properly. In addition, you visit existing installations to perform other service activities such as machine inspections, upgrades & updates or problem solutions.

Do you, together with your colleagues, accept the challenge not only to keep the machine running properly, but also to implement improvements in the department and our process?

What we ask of you

- MBO degree in Industrial Automation / Mechatronics / Electrical Engineering or Mechanics
- Demonstrable experience as a Commissioning Engineer or (Field) Service Engineer within machine building or other high-tech industry in an international environment.
- Knowledge of PLC systems, Vision systems and / or CoDeSys systems (Schneider Electric)
- Experience with the high quality and hygiene requirements of the food packaging industry.
- Mastering the Dutch and English language, a plus: German language

You get this from PWR:

- Working for a technically advanced organization where innovation plays an important role; who wouldn't want that?
- Join #teamPWR; pleasant ambiance, friendly and enthusiastic colleagues with yearly and seasonal activities
- A fulltime job position (40 hours/week) with flexible working times (07.00 am – 18.00 pm) and of course a matching salary and secondary employment conditions (25 vacation days and 13 ADV)
- Excellent compensation for staying abroad
- Focus on personal vitality (budget for sports), development and education

Convinced we will be a good match

Now it is up to you! If you want to know more, please contact Rosemarie Tekampe, HR Manager. She can be reached by phone from January 4th 2021. If you want to apply directly, send an e-mail with a short motivation and CV to recruitment@pwrpack.com. In the first week of January we will inform you about the procedure. See you soon!

About us

PWR is the specialist for custom-made automated robotic packaging solutions in the Food industry. We are specialized in high speed packaging of products with Delta robots. Our products are premium technical solutions of which we master the technology which we constantly develop.

We understand our customers' needs by engaging with them throughout the entire process. With the most up to date technology we ensure the highest running efficiencies, minimum down time, low cost of ownership and the best price to value ratio in the industry.
