

## Vacancy Mechanical Engineer

### This will be your job

With your excellent knowledge of machines, robots and related parts AND good design skills, you contribute to the development of our high-quality robotics solutions. You're working organized and structured and you're understanding great work results from the smallest details.

As a mechanical engineer you're not only working on new designs, but you can also adapt and upgrade existing equipment by making the most of the possibilities. Your own input and initiative with regard to new developments and improvements to existing techniques, is highly appreciated!

### Success is yours by

You are an active member of the mechanical engineering department (approx. 8 engineers), you work closely with colleagues from other departments (such as concept engineering and automation) and you participate in project groups within the organization. You will have the opportunity to participate in the most challenging projects.

Your activities include the following tasks and responsibilities:

- Designing and developing highly dynamic robots, grippers and peripherals in Solid Works
- Making production and assembly drawings, parts lists and performing (simple) strength calculations.
- Making a risk inventory with due observance of the CE regulations
- Providing input for and writing manuals related to the mechanical part
- Guiding or (occasionally) making prototypes and testing customer-specific solutions.
- Guiding the assembly employees during assembly / construction.
- Where appropriate, consult (including answering questions) with suppliers and (internal and external) customers about designs and their elaboration.

### What we ask of you

- HBO degree in mechanical engineering
- Minimum 3 years of demonstrable experience as an engineer
- Good control of one or more 3D CAD applications, preferably Solid Works
- Good knowledge of CE regulations
- Good command of the Dutch and English language; a plus: you also speak German
- Knowledge of current software programs (MS Office)

### What does PWR offer you

- Working at a technically advanced organization where innovation plays an important role. Who doesn't want that?
- join #TeamPWR; good atmosphere, great colleagues and various annual and seasonal activities;
- Excellent compensation for staying abroad;
- Full time employment (40 hours pw) and of course an appropriate salary and fringe benefits (25 vacations and 13 ADV days);
- Plenty of attention for development, training and personal vitality (sports budget).

### Convinced we will be a good match?

Now it is up to you! If you want to know more, please contact Rosemarie Tekampe, HR Manager. If you want to apply directly, send an e-mail with a short motivation and CV to [recruitment@pwrpack.com](mailto:recruitment@pwrpack.com). See you soon!

## About us

PWR is the specialist for custom-made automated robotic packaging solutions in the Food industry. We are specialized in high speed packaging of products with Delta robots. Our products are premium technical solutions of which we master the technology which we constantly develop.

We understand our customers' needs by engaging with them throughout the entire process. With the latest up to date technology we ensure the highest running efficiencies, minimal down time, low cost of ownership and the best price to value ratio in the industry. A good relationship with our customers is a vital part of our company.

PWR operates globally with our head office located in Ede, central in the Netherlands.
